

practical and neutral

# Hygiene 2000

## With Ebnat you are one step ahead.

Ebnat stands for quality, innovation and customer orientation. Our products can be optimally integrated into your range to suit your particular requirements. We support you on-site with our professional consulting service and the information given on products and packaging ensures clarity at the POS.

## With Ebnat you are representing your customers' wishes.

Our high quality products set new trends in the household sector. We are constantly ensuring that they are in line with customer requirements, as well as being easy and practical to use.

## What Ebnat makes is Swiss quality.

Our company stands for the Swiss tradition for precision. We have been researching, developing and manufacturing in our specialist areas for decades: household cleaning, dental care and personal hygiene products. Our experiences are continually being converted into the most up-to-date products and innovations.

**Ebnat**  
SWITZERLAND

hygienic and application-specific

**Ebnat products – hygienic due to their heat resistance up to 95°C.**

Two different Hygo lines ensure optimum cleaning performance depending on the desired area of application.

For fine dirt, such as animal hair, dust, etc., we recommend our line with the pale blue and extra fine head. For all other uses, the existing line with the dark blue and white head is ideal. As both product lines are washable up to 95°C, all bacteria are killed and the entire product range features superior hygiene.

super soft and washable

the new, superfine bristle material ensures gentle cleaning

practical bottle brush with spiral head for cleaning bottles of any kind

thanks to the click system, this dustpan and brush set can be stored with minimum space requirements

convenient and heat resistant

the scrubbing brush for effective and spotless cleaning

the dual head of the washing-up brushes ensures optimum cleanliness

a suitable handle for every application
