

competent and easily adaptable

Dental Stick

With Ebnat, you have a unique range of products.

Its versatility enables you to differentiate yourself from your competitors. Whether it's individual sticks in a practical plastic box or a set of scented stick combs in a cardboard envelope, they are always suitable for transport and they always bear your label. Please note that we offer a variety of combination options, as follows:

With Ebnat, you are a representative of natural quality.

With Dental Sticks that are made of birch and beech wood, Ebnat Switzerland is committed to being certified according to FSC®. FSC® is the only wood label that is valid at international level. It guarantees near-natural and socially compatible forest management. The controlled use of wood that is oriented to sustainability is based on long-term return on investment. That is why it is not only the producers, the companies that refine the wood and the consumers who benefit from it, but also the local population and nature.

Ebnat products have Swiss quality.

As a producer in Switzerland, we represent superb quality and fulfil the requirement of staying close to the market and thus to the consumer by constantly developing our products further as well as generating innovative ideas. In return for the consumer's trust, we undertake to conduct development, production and sales throughout our company according to the ISO 9001 quality standard and to handle resources in a future-oriented manner in accordance with the 14001 standard.

progressive and optimised

With Ebnat, you revitalise your range of interdental products.

The Dental Sticks line from Ebnat is characterised by its quality and its versatility. Depending on their type, the Dental Sticks are manufactured in FSC®-certified beech or birch wood on state-of-the-art production systems. The forms of the products that have already been optimised are constantly being complemented by new types. The Sticks can be produced as combs or individually or in raw or scented form, depending on your requirements.

With Dental Sticks, Ebnat is setting new standards in interdental care.

mature and environmentally responsible

we only used FSC®-certified birch and beech wood

different cutting forms present no problems at all, because we manufacture Dental Sticks ourselves

on request, we will give your Dental Sticks a scent, in the desired aroma strength

variable and user-friendly

we supply the ideal packaging for every kind of use

we offer three strengths for specific cleaning

an extra-short stub reduces plaque formation
