

Dynamic

Dynamic and well thought-out

Modern, ergonomic and thorough. With its snappy design and double contour cut, the «Dynamic» toothbrush is the ultimate in up-to-date dental hygiene.

The colourful, ergonomically shaped handle with non-slip TPE areas on the front and back allows the brush to be guided safely during use.

The special wave-shaped cut of the «Dynamic» bristles maximises and optimally distributes the contact surface on the tooth. This allows an even, gentle cleaning of the tooth surfaces up to the gum line, including massage

of the gums. In addition, the well-thought-out architecture of the toothbrush cushions the pressure on the teeth.

Like all Ebnat toothbrushes, the «Dynamic» was developed in cooperation with a Swiss university and tested for its cleaning performance.

optimised contact characteristics thanks to the double contour cut

stiffness matched to area of use

optimised bristle area for clinically tested cleaning performance

pleasant TPE anti-slip surface

ergonomic design for a comfortable cleaning experience

space for your own label
