dynamic
ebnatdent[®]

With Ebnat, you make perfect dental care available to your customers.

Ongoing research and development in the areas of dental and oral hygiene are translated into ergonomic design that ensures effective, yet gentle dental care.

Everything Ebnat does boasts outstanding quality.

It is not just our ISO certification that makes us feel obliged to provide the best quality. Quite simply, it is our mission to provide innovative services with experience and skill, ensuring benefits for our customers and quality of life for consumers.

Ebnat
SWITZERLAND

dynamic and efficient

Ebnat delivers efficient dental care.

Modern, ergonomic and thorough. With its snappy design and contour cut, the *ebnatdent dynamic* is the ultimate in up-to-date dental hygiene.

The colourful, non-slip handle has the ergonomic job of making sure pressure is applied to the teeth accurately and with a flexible amount of springiness.

Thanks to the optimised contact area of the bristles, the pressure applied by the toothbrush is controlled, which allows gentle cleaning up to the edge of the gums, including massaging of the gums.

thorough and clean

optimised contact characteristics thanks to the double contour cut

stiffness matched to area of use

optimised bristle area for clinically tested cleaning performance

well thought-out and ergonomic

thumb-stop for good grip and reliable control

ergonomic handle for flexible pressure springiness

space for your own label
