

# Fusion

## Modern and aesthetic

With its modern design and high-quality materials, it is the ideal «lifestyle brush» and a real eye-catcher in every kitchen.

The fresh colour of the brush head completes the appealing look. But looks are not everything. The dishwashing brush is not stingy with inner values either. The handle is made of high-quality FSC® certified Swiss beech wood and is available in two practical lengths.

Thanks to the hanging hole on the handle, the brush can be stored in a space-saving way. The click function allows

it to remove the wooden handle from the head and clean it hygienically separately in the dishwasher.

The brush head with black, slightly harder polyester trim is ideal for pans and stubborn dirt. In contrast, the brush head with white, slightly softer polyester trim is ideal for cleaning dishes gently and effectively.

This dishwashing brush facilitates waste separation. When the brush is worn out, it can be separated with just one «click» and thus optimally disposed of.

handles made of FSC® certified Swiss beech wood

the advantages of wood and plastic in a semi-permanent connection

with practical hanging hole on the wooden handle

white, soft trim for dishes

black, hard trim for uncoated pots and pans

the brush heads can be cleaned in the dishwasher
