

holistic and multifaceted

The new Ebnat Oral Care range is impressive.

It is a range which clearly wins people over. With 8 different interdental brushes, a broad target group is addressed. All products are hygienically blister-packed. We will provide your individual range.

Keep up with the times with Ebnat.

We are in constant contact with leading research centres to ensure that we continue to set top-quality trends in the oral care segment.

**Ebnat products have sustainable quality.**

We are specialists with many years of experience and expertise in the interdental cleaning sector. Benefit from our innovations in this growth market and offer your customers quality of life in the form of reliable product services.

efficient and flexible

**The new Oral Care range**

The new Oral Care range provides comprehensive and effective cleaning and care of hard-to-reach spaces between teeth.

With eight different brush types, the range is able to muster the best adapted and most effective cleaning solution for every between-teeth place. The plastic-coated wire makes the cleaning of the tooth enamel particularly gentle.

The multiple-use cap completes the genius of this product: as protection at the upper end of the brush, and the grip extension on the rear end of the body.

	Size according to ISO 16409	min. passable hole diameter	Brush diameter	Wire diameter
sensitive	0	0.6 mm	1.5 mm sensitive	0.200 mm
	0	0.7 mm	2 mm sensitive	0.225 mm

efficient	1	0.8 mm	1.5 mm	0.200 mm
	1	0.8 mm	2 mm	0.225 mm
	2	0.9 mm	3 mm	0.250 mm
	3	1.1 mm	4 mm	0.250 mm
	3 conical	1.1 mm	3-5 mm	0.250 mm
	4	1.4 mm	6 mm	0.250 mm

accurate and user-friendly

there is the right solution available for every between-teeth area: the range offers 6 different diameters and two different fill materials

the flexible 2-components body allows for safe use

plastic-coated wire for a most gentle cleaning

fashionable and practical

especially non-slip 2-component application for a secure fit between thumb and forefinger

the closing cap may be used as a practical handle extension

the brush is well protected by the closing cap: optimal for when on the go
