

# Joint brush

## Clean to every darkest corner

The perfectly designed joint brush ensures sparkling clean joints, grooves and crevices around the house in the blink of an eye.

Thorough, fast and gentle cleaning thanks to fine bristles: The specifically narrowly arranged rows of bristles on the one side of the brush fit perfectly into gaps that would otherwise be difficult to reach.

However, thanks to the broadly based press cut on the other side of the brush, it is also optimal for cleaning larger areas.

The ergonomically designed handle of the joint brush can be used to remove deposits quickly and without exerting force.

Product Movie

use with or without cleaning agent

gentle removal of deposits without exerting force

multifunctional application thanks to the circular arrangement of the bristles

for sparkling clean joints, grooves and crevices
