

# Omnia

## The all-rounder for all areas of application

«nomen est omen»! The term «omnia» is Latin and means «everything».

With our «omnia» assortment you have a tool, which offers efficient support wherever you need it. Whether used in- or outdoors, dry or wet, «omnia» is perfect for everything!

The special attachment mix made from purely plant-based arenga and fibre fibres offer special characteristics.

The fine and soft but still resistant attachment binds dust when used dry and in wet use it absorbs water perfectly.

The «omnia» attachment is also very elastic – it always straightens again. This assures a long durability, is thus resource friendly and truly sustainable.

Due to its specifications the attachment material is suitable for all ground conditions – in- and outdoors.

special attachment mix from purely plant-based materials (arenga and fibre)
