

Pure

Puristic and timeless

This simple and well-designed toothbrush «Pure» is an eye-catcher in every bathroom. However, it offers not only optical advantages, but convinces above all by its pleasant handling and its great cleaning performance.

The matte soft-touch surface gives «Pure» a high-quality appearance, a pleasant feel and a very good grip during use.

Due to its slim design, material is saved, which makes «Pure» – in comparison to conventional toothbrushes – far more ecological. In addition, it can also be made from bio-based plastic.

The straight bristle area offers an extremely thorough cleaning performance thanks to the dense trimming. The proven «round end» of the individual bristles is gentle on gums and tooth enamel.

The toothbrush «Pure» is available in two different versions: with a small and a large head. In this way, it optimally fulfils the wide range of individual user requirements.
