

White

Brilliant and efficient

The «White» toothbrush has been developed specifically for targeted cleaning and beautiful, white teeth.

The effective whitening brush head increases the cleaning performance and counteracts tooth discolouration. Rubber bristles massage the gums, polish the tooth surface and distribute the toothpaste foam optimally.

Due to the flexibility in the centre of the handle, the pressure on the teeth and gums is balanced, thus preventing excessive scrubbing. In addition, the grooved TPE

anti-slip surfaces ensure safe guidance of the brush and a comfortable cleaning experience.

With the integrated tongue cleaner on the back of the brush head, the «White» toothbrush achieves holistic oral hygiene as well as a pleasant feeling of freshness.

Like all Ebnat toothbrushes, the «White» was developed in cooperation with a Swiss university and tested for its cleaning performance.

effective whitening brush head

rubber bristles massage the gums and polish the tooth surface

flexibility in the centre of the handle

ergonomically-designed brush handle for good grip when brushing

integrated tongue cleaner on the back of the brush head

area for individual embossing at the end of the handle
