

clear and explicit

With Ebnat you make a name for yourself in the market.

Ebnat stands for quality, innovation and customer focus. For you, this means professional advice and optimal product presentation with respect to your product range. For your customers, this means clear information through the product and packaging, and loyalty through a good experience when using the product.

Stylish, functional and effective

Every new product starts with the customer requirement. However, when developing our new generation of toothbrushes, we also attached great importance to the design, functionality and effectiveness. All toothbrushes were developed together with a Swiss university and tested with respect to their cleaning performance. Furthermore, various additional benefits such as the suction cup for the children's brushes, flexible brush heads and handles, tongue cleaner and a novel fan-like press cut provide tangible added value for the consumer or user.

Thanks to Ebnat your customers receive a healthy dentition.

Ebnat is leading with its products for daily oral care and oral hygiene at home and also on the way. Thus your customers receive a healthy dentition. You can find additional products at www.ebnat.ch.

What Ebnat is doing is also always pioneer work.

Ebnat Switzerland stands for quality. For decades we produce toothbrushes and commit ourselves thereby to permanent research and development. By using and testing new materials, forms and technologies we do valuable and internationally recognised pioneer work in the field of dental care.

Wooden Toothbrush

Naturally one step ahead

The combination of wooden handle and nylon bristles combines naturalness and competence.

The handle is made of high-quality, natural FSC® certified Swiss beech wood from the region. This is by nature non-slip and ensures safe handling during the cleaning process. Thanks to its shape, the toothbrush also fits comfortably in the hand.

If desired, the handle can be treated with a vegetable, mineral oil free wax. The toothbrush is therefore completely vegan.

The mineral oil free nylon bristles meet high dental hygiene requirements and therefore guarantee the desired oral hygiene. With the compact head all places in the mouth area are reached. Thanks to the dense punching, every tooth is optimally cleaned all around.

If desired, bristles can be used which consist of up to 100% biologically renewable raw materials.
